## SAFETY INFORMATION

## CONTENT

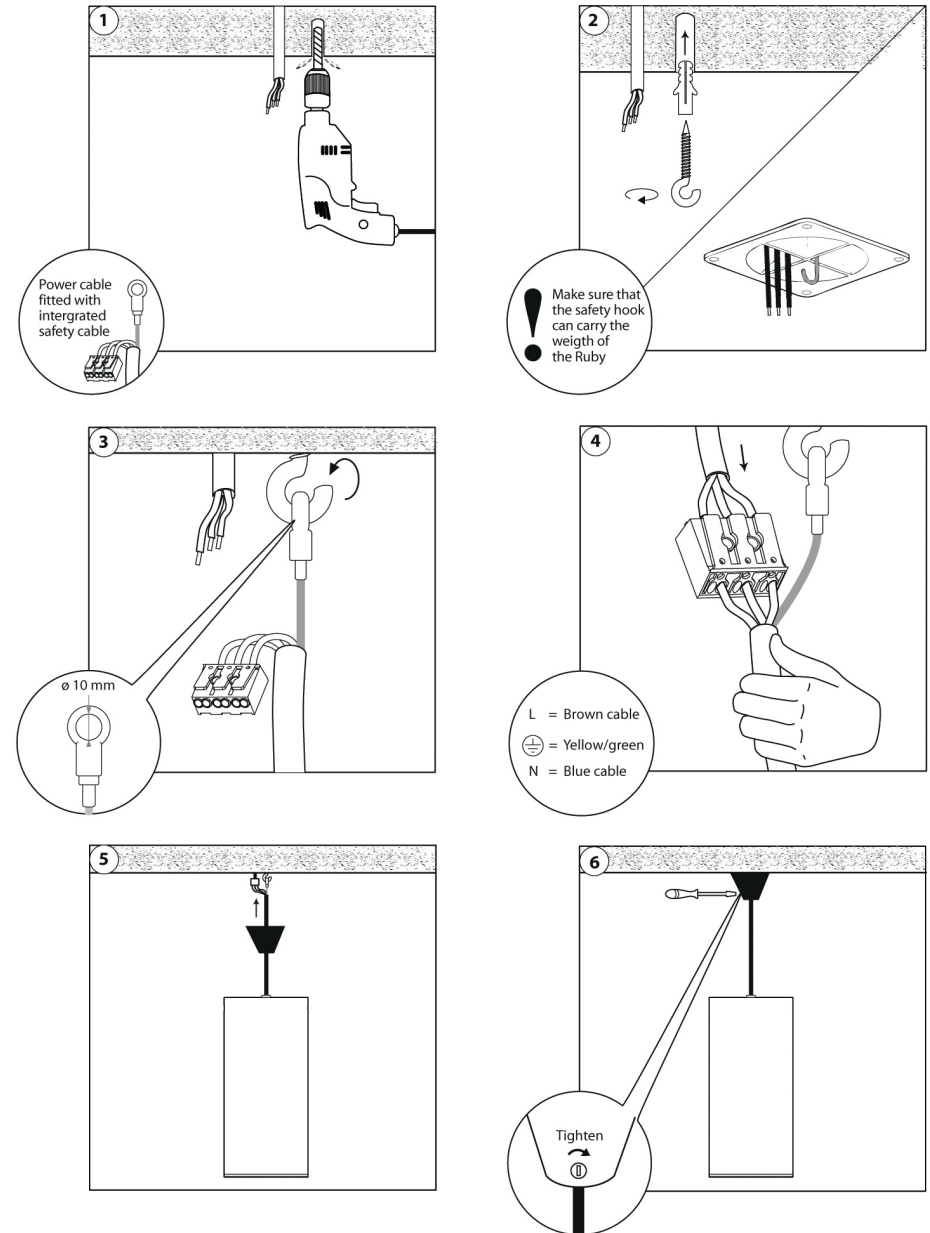

### SPECIFICATIONS

LED:	High Power LED
Available colours:	CRI>80: 2500K & 2700K CRI>92: 2700K, 3000K, 3500K or 4000K
Colour Changing:	RGBA, RGBW (w: 3000K) or RGBW (w: 4000K)
Tunable White:	1800K-4000K or 2700K-6500K
Dim To Warm:	1800K-3000K
Lenses:	19°, 37° or 63°
Power supply:	200 ~ 240 VAC
Power consumption:	6 serie: Max. 30 Watt
Housing:	Anodised aluminium black or white coated
Weight:	1300 gr
IP value:	IP20
Cable length:	200, 400, 600 or 800 centimeters
Measurements:	232 x 100 mm (hxø)
Ambient temperature:	-10° C till +40° C

### ACCESSORIES

Y106017	CLS Magnet for programming, 5 pcs
122200	CLS D-ta DMX addresser

# INSTALLATION DMX VERSION

# PROGRAMMING DMX

**1** 5 core combi cable fitted with integrated safety cable

**2** Make sure that the safety hook can carry the weight of the Ruby

**3**  $\varnothing 10\text{ mm}$

L = Brown cable  
 ⊕ = Yellow/green  
 N = Blue cable  
 DMX + = Red cable  
 DMX - = White cable

**4** 5 core combi cable connection scheme  
 See step 6 for the amount of Ruby's per switch-on

yellow/green ⊕  
 Brown L  
 Blue N  
 Red DMX +  
 White DMX -

**5** Tighten

**6** Maximum amount of Ruby's per switch-on \*

5 serie - 22 Watt:	25 pieces
6 serie - 30 Watt:	25 pieces
7 serie - 45 Watt:	5 pieces
8 serie - 60 Watt:	5 pieces
9 serie - 110 Watt:	5 pieces

\* Due the switch-on peak

All settings can be configured via DMX. Settings can be configured at once or separately. When one or a couple settings needs to be changed just leave all other setting values zero. This keeps those settings unchanged. Please check the table for more information.

Always use a DMX controller with digital interface. If not available, you can purchase the CLS D-ta DMX addresser unit (#122200).

First make sure to set the DATA on the DMX controller. To program the setting into the LED fixture follow the next steps.

**1** Place magnet on the indication mark. The LEDs will light up

**2** After 2 seconds The LED's will flash 3 times confirming storage\*

**3**

\* If all LEDs flash 10 times, something went wrong. Please try again. If the problem continues to occur, please contact your local sales distributor.

## WIRELESS DMX

See the Manual of Wireless Solutions. The Manual can be found on our CLS website, in the Downloads section. Or use the link below  
<https://www.cls-led.com/wp-content/uploads/cls-files/W-DMX-manual.pdf>

### Unlink procedure

When the fixture does not receive a DMX signal (DMX controller off), place the magnet on the bottom of the fixture for 5 seconds. Slow flash indicates that the fixture is unlinked.

## BLUETOOTH BY CASAMBI

For Casambi controlled fixtures, see the manual of Casambi. The Manual can be found on our CLS website, in the Downloads section. Or use the link below:  
[https://www.cls-led.com/wp-content/uploads/cls-products/CLS\\_CASAMBI/MANUAL/Manual\\_Casambi\\_controlsistem\\_EN.pdf](https://www.cls-led.com/wp-content/uploads/cls-products/CLS_CASAMBI/MANUAL/Manual_Casambi_controlsistem_EN.pdf)

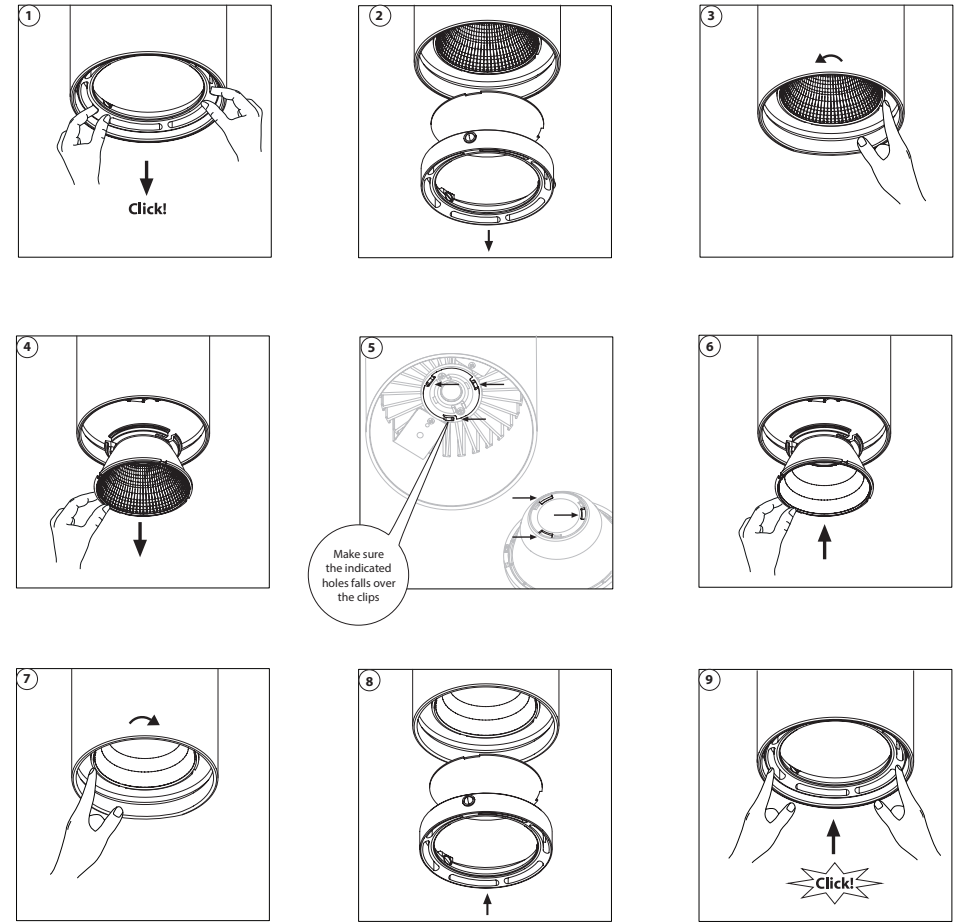

# PROGRAMMING TABLE

# REFLECTOR REPLACEMENT

PROGRAMMING TABLE				
DMX	Function	Data	Parameters	Description
CH1	Set address 001 to 255	0	0 = no change *	Use this DMX channel to set address from 001 to 255. The configured DMX address is called "n"
		1...255	DMX address = 1...255	
CH2	Set address 256 to 508	0	no change	Use this DMX channel to set address from 256 to 508. The configured DMX address is called "n"
		1...255	DMX address = 256...508	
CH3	Static behavior	0	no change	If no DMX is present the fixture will respond like set in this function.
		1	last DMX value *	
		2	output off	
		3	load static values	
CH4	Soft dim	0	no change	When dynamic softdim is activated an extra DMX channel behind the colours and/or Master controls the soft dim reaction. If fixed no extra DMX channel is used.
		1	off *	
		2	dynamic	
		3-250	fixed interpolation delay	
CH5	Master control	0	no change	If master is first channel is selected the channel will be DMX channel "n". If master is last channel is selected the channel will be "n+x" ("x" is calculated in the output patch).
		1	no master used *	
		2	master is first channel	
		3	master is last channel	
CH6	Output 1 patch	0	no change	Each output channel can be patched to respond to the desired DMX channel. This enables the user to mix up the colours according to the controller that is used.
		1	DMX channel n	
		2	DMX channel n+1	
		3	DMX channel n+2	
		4	DMX channel n+3	
CH7*	Output 2 patch	0	no change	<b>Example: all outputs are patched as 1</b> All outputs will be controlled by DMX channel "n". If master is used total DMX channels will be 2 otherwise it uses 1 channel ("x" = 1).
		1	DMX channel n	
		2	DMX channel n+1	
		3	DMX channel n+2	
		4	DMX channel n+3	
CH8*	Output 3 patch	0	no change	<b>Example: output 1&amp;2 are patched as 1 and 3&amp;4 are patched as 2</b> Output 1&2 will be controlled by DMX channel "n". Output 3&4 will be controlled by DMX channel "n+1". If master is used total DMX channels will be 3 otherwise it uses 2 channels ("x" = 2).
		1	DMX channel n	
		2	DMX channel n+1	
		3	DMX channel n+2	
		4	DMX channel n+3	
CH9*	Output 4 patch	0	no change	If master is used total DMX channels will be 3 otherwise it uses 2 channels ("x" = 2).
		1	DMX channel n	
		2	DMX channel n+1	
		3	DMX channel n+2	
		4	DMX channel n+3	
CH10	Static output 1	0	no change	Each output channel can be set to a static intensity.
		1	output off	
CH11*	Static output 2	2...255	intensity 2...255 *(255)	If no DMX is present and Static behavior is set to "load static values". The outputs will be set to the configured intensity values.
		0	no change	
CH12*	Static output 3	1	output off	
		2...255	intensity 2...255 *(255)	
CH13*	Static output 4	0	no change	
		1	output off	
CH14*	Load default settings	2...255	intensity 2...255 *(255)	
		0	no change	
CH15	Resolution setting	0	no change	This function resets all settings to the Factory setting.
		1	load Factory settings	
CH16	Drive mode setting	0	no change	In 16 bit mode 2 channels are used per colour. First channel is rough channel, second channel fine. 16 bit mode is only available in DRIVE mode 2.
		1	8 bit *	
		2	16 bit	
		0	no change	
CH16	Drive mode setting	1	compatible with version < 2020	You can set the frequency of the PWM for best compatibility with Camera Systems. However, the highest resolution of the dimming curve will be at the lowest frequency. Option 1 can be used to be compatible with older installation and new fixtures.
		2	PWM frequency 0.7kHz *	
		3	PWM frequency 1.4kHz	
		4	PWM frequency 2.8kHz	
		5	PWM frequency 5.6kHz	

\* Default setting

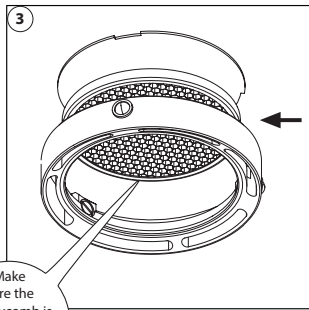

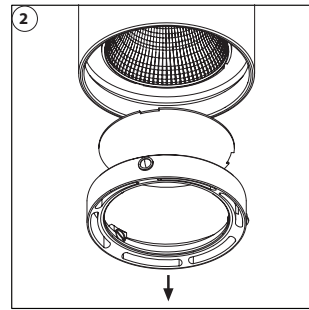

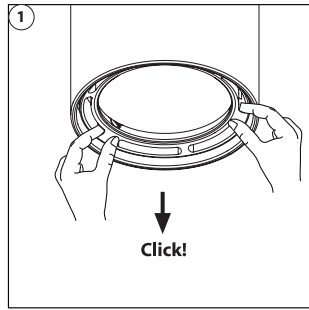

CHXX\* Not applicable on the Ruby DMX single colour

# HONEYCOMB ASSEMBLY

# LIST OF SYMBOLS

Make sure the honeycomb is placed between the diffuser & front ring

	<b>Protection class</b> One, two or three		<b>Retail &amp; Food LED modules</b> Clothing, furniture, kitchens, jewellery, shoes, bread, meat, fish and vegetables & fruit.
	<b>Application area</b> Indoor or outdoor		<b>Application area</b> Floor, wall or ceiling
	<b>Swivel</b> Fixture is horizontally rotatable, indicated in degrees		<b>Swivel</b> Fixture is vertically rotatable, indicated in degrees
	<b>Multiple connection</b> Daisychain connectivity		<b>Installation depth</b> In centimeters
	<b>Installation size</b> In centimeters		<b>Cable length</b> Maximum cable attached to the fixture in centimeters
	<b>Driver</b> Inclusive or exclusive Internal or external		<b>Weight</b> In grams/kilograms
	<b>Pressure</b> Maximum pressure on the fixture in kg/cm <sup>2</sup>		<b>Lifespan</b> Of the light source in hours
	<b>Lenses</b> Available lenses, indicated in degrees		<b>Performance Zoom</b> Adjustable beam angle
	<b>LEDs</b> Kind of LED used in the fixture		<b>Plug &amp; play</b> Easy connection using the SmartConnect system
	<b>IP value</b> Ingress Protection classifies the degrees of protection provided against the intrusion of the product		<b>Colour changing</b> RGB, RGB-W, RGB-A, AWB or Tunable White
	<b>Retail &amp; Food LED modules</b> Clothing, furniture, kitchens, jewellery, shoes, bread, meat, fish and vegetables & fruit.		<b>Colour</b> Available colours: Amber, blue, red or green
	<b>White colour temperature</b> In different Kelvin values: Cold white, neutral white, warm white or extra warm white		<b>Curve</b> Minimal bending curve in centimeters
	<b>Cutting length</b> Indicated by the cutting marks		<b>LED pitch</b> Pitch between the LEDs in millimeters
	<b>Power supply</b> In VDC, VAC or milliAmpere		<b>Power consumption</b> In VA or Watt
	<b>Dimmable</b> 1-10 Vort, Phase, individual, DMX dimmable or DALI		<b>PWM dimming</b> Traditional PWM dimming, DMX analog or DMX Hybrid dim
	<b>Bluetooth controlled</b> By Casambi		<b>Magne dimming</b> Accurate dimming from 100 - 1% by using a magnet
	<b>Dynamic Control</b> Dynamic Power Control or Dynamic Temperature Control		<b>DMX input</b> Fixture works on DMX512 protocol or Wireless DMX
	<b>Combined product</b> Compose your own fixture		<b>Warranty</b> 3 or 5 years warranty on the product
	<b>Conformité Européenne</b> CE marking for free marketability of industrial goods within the EU		<b>Energy label</b>
	<b>Lightsource</b> Equipped with a CLS, Bridgelux or a Xicato LED module
