[*1]　x.v.Color/3D/ARC/HEC/CEC are not supported.
[*2]　The maximum specified distances may not be achievable with some device combinations, cabling method, or other manufacturer's cable. For the same reasons, video signal disturbances or interruptions may occur, even if signals are within the specified distance (cable length) parameters.
　　The maximum cable length varies depending on the connected devices. The specifications have been qualified under following conditions:
　　　・HDMI (1080p@60)　: When IDK's 24 AWG cable was used and signal of 1080p@60 24 bits was transmitted.
　　　・HDMI (4K@60)　　 : When IDK's 18 Gbps supported cable was used and signal of 3840x2160@60 24 bits was transmitted.
　　　・10GbE　　　　　 : When CAT6A (STP) cable is used.
[*3]　For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will correct these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnected. This feature only works for the NJR-L's output. Connecting other devices between the NJR-L's outputs and sink devices, may interfere with the operation of this feature.
