

KioscTouch2

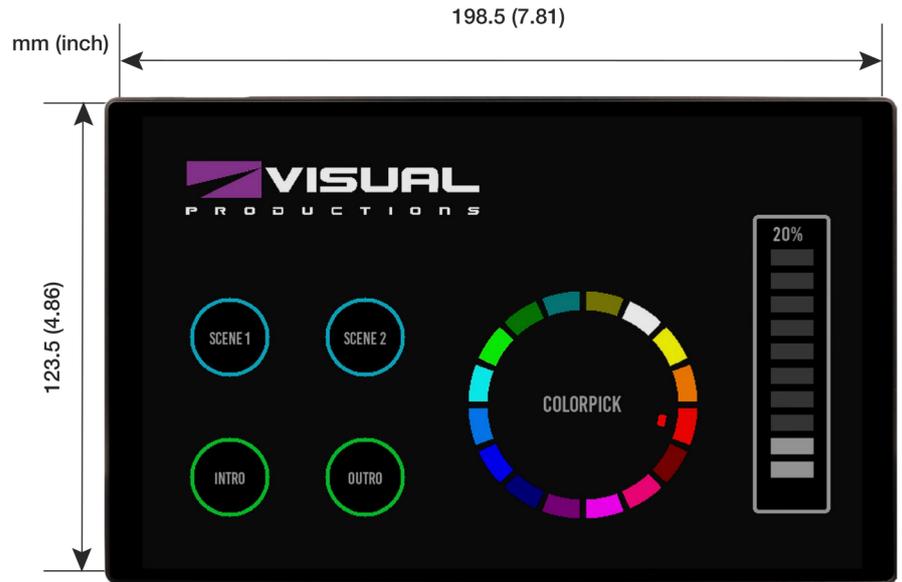

KioscTouch2 is a wall-mount touch screen providing an intuitive front-end for lighting control systems, with extensive personalisation options.

Installation is flexible and simple, featuring magnetic mounting on a steel base plate and PoE-powered RJ-45 connectivity for rapid setup.

It remotely controls lighting engines via UDP, OSC, and TCP protocols, and integrates seamlessly with Visual Productions and third-party AV equipment.

The Kiosc Editor app enables full dashboard customization for user-friendly operation, with a broad range of interactive controls.

The Kiosc App extends control to tablets and desktops, supporting Windows, macOS, Linux, iOS, and Android platforms. Available on every app store.
